

TRUE LOCK 4.5mm Proximal Tibia Medial Anatomic Plates are indicated for steepenic bone, tibial osteotomies, nonunions, malunions, and fractures of the proximal tibia including:

- Simple, comminuted fractures.
- Lateral wedge fractures.
- Depression medial wedge fractures x Bicondylar combination of lateral wedge and depression fractures.
- Periprosthetic fractures.
- Proximal fractures with associated shaft fractures.

Tibia plateau fractures make up 1-2% of all fractures and are in the third rank of adult fractures in terms of their incidence during 50 years of life. Plateau fractures involving the tibia upper end joint range widely from complex fractures caused by mild injuries.

Anatomical plate; right & left.

6 hole options between 4-14.

TRUE LOCK 4.5mm Proximal Tibia Medial Anatomic Plates are made of Ti6Al4V ELI material (ASTM F136).

TRUE LOCK 4.5mm Proximal Tibia Medial Anatomic Plate Features

TRUE LOCK 4.5mm Proximal Tibia Medial Anatomic Plate Screws Info

Reference Number:	Hole Count:	Length (mm)
(L) 201-11531-004 (R) 201-11532-004	4 hole	115
(L) 201-11531-006 (R) 201-11532-006	6 hole	150
(L) 201-11531-008 (R) 201-11532-008	8 hole	185
(L) 201-11531-010 (R) 201-11532-010	10 hole	220
(L) 201-11531-012 (R) 201-11532-012	12 hole	255
(L) 201-11531-014 (R) 201-11532-014	14 hole	285
